MARXIST PHILOSOPHY OF SCIENCE:

The Newspaper

SATURDAY, 28 NOVEMBER 2026

Today's edition highlights the growing intersection of artificial intelligence with global economics, politics, and technology, as AI agents complete business transactions, nations propose using AI for negotiations, and major tech companies deploy advanced AI chips, while semiconductor trade surpasses traditional energy markets and vaccine campaigns leverage social media platforms.

ECONOMY AND POLITICS

RT en Español: Semiconductor trade surpasses oil and gas market for first time

RT EN ESPAÑOL · SINGLE SOURCE

Global semiconductor trade has exceeded the oil and gas market for the first time in history, challenging the financial system established in 1974. This shift represents a significant change in the global economic landscape, potentially reducing US financial dominance.
