Russia Receives Innovation Cooperation Proposals from 30 Countries - Putin

RT NEWS

President Vladimir Putin announced that Russia has received innovation cooperation proposals from approximately 30 countries across Europe, North America, and the Middle East. These proposals will be submitted to the Russian government for further consideration, potentially opening new opportunities for Russian industries and expanding international cooperation.

We've received proposals not only from all constituent entities of Russia but also from some 30 foreign countries, including from Europe, North America, the Middle East, and other regions of the world

Trump Uses Saudi Nuclear Agreement as Leverage for Saudi-Israel Normalization

RT EN ESPAÑOL

The nuclear agreement signed with Saudi Arabia in July has been transformed by President Trump into a tool to pressure for normalization between Riyadh and Tel Aviv. The treaty originally permitted peaceful energy cooperation but has now become a diplomatic lever.

Russia Begins Mass Production of System to Interfere with Starlink

IRINA

Russia has started mass production of the Volná Kupol Garant electronic warfare system designed to counteract the Starlink satellite system. The system effectively blinds satellite antennas without affecting ground terminals and has proven effective in countering US/Ukrainian kamikaze drones controlled via Starlink during attacks on Crimea.

The Volná Kupol Garant system has proven effective and we have begun producing it in series. Now quantity has become quality, and in essence, we have closed the sky to Starlink actions where we need it. It is unbearably painful for the enemy

CIA Director's Moscow Visit Sparks Speculation Among Russian Media

RT NEWS

CIA Director John Ratcliffe made a secretive visit to Moscow, confirmed by Russian SVR head Sergey Naryshkin. The visit has sparked various theories in Russian media about its purpose, including discussions on Ukraine, nuclear concerns, and intelligence cooperation. The secretive nature of the visit highlights ongoing tensions and potential backchannel communications between the US and Russia.

"The Americans can see that Moscow's and Kiev's positions are 100% incompatible. As master negotiators, they are asking whether there is some kind of middle ground." - Sergey Markelov, political analyst

US Pursues Access to Venezuelan Oil Resources

BLOOMBERG MARKETS

The United States has restored diplomatic relations with Venezuela and is collaborating with the interim government of Delcy Rodríguez following the ousting of President Nicolás Maduro. Despite Venezuela's diminished oil production, the country still possesses some of the world's largest oil reserves, making it strategically important to the US.

Meta Developing AI Agent Hatch for Consumer Purchases and Reservations

GENERACIÓN IA

Meta is developing an AI agent called Hatch that can make purchases and reservations on behalf of users. The system will integrate with services like DoorDash, Etsy, Reddit, Yelp, and Outlook, featuring a customizable panel for organizing tools. Premium access is expected to cost \$199.99 per month, with a new AI model called Watermelon reportedly planned for October.

AI-Generated Images Found in Google Earth Raise Reliability Concerns

GENERACIÓN IA

AI-generated images have been circulating within Google Earth, a platform used for viewing real-world locations. This mixing of artificial and real content risks spreading misinformation through a source typically considered reliable. The article calls on Google to detect and remove such material to maintain user trust.

El problema no está solo en que una imagen sea artificial, sino en que pueda confundirse con una captura real.

Reddit Post Questions Privacy Trade-Offs for AI Convenience

R/CHATGPT

A Reddit post explores whether users are trading privacy for AI convenience by allowing systems access to personal data like emails, locations, and potentially financial information. The author questions if consolidating this data with one AI creates greater risks than spreading it across different services. The post highlights how we may already be sacrificing privacy for convenience without fully considering it.

Would you rather give one ai access to almost everything if it made it significantly more useful or spread different pieces across different ai companies so no single one has the full picture?

Developer Creates Tool to Bypass Claude Enterprise Restrictions

R/CLAUDECODE

A developer created “Jean-Claude,” a Node.js MITM proxy that intercepts Claude Code’s calls to enterprise settings and serves custom configurations instead. The tool allows users to bypass restrictions like disabled auto mode or denied commands set by administrators. The developer notes this enables them to restore auto mode without their manager’s knowledge.

Claude Code asks what it’s allowed to do; Jean-Claude whispers “whatever you want, king.”
